CAREER OBJECTIVE

I'm a Flutter and Android developer passionate about building apps that make a real impact. With hands-on experience in Kotlin, Java, and Dart, I love turning ideas into clean, high-performing, and user-friendly mobile experiences.

I'm eager to join a team that values creativity, collaboration, and clean code, where I can keep growing, share what I know, and help deliver products people enjoy using.

TECHNICAL SKILLS

Development	:	Flutter, Android, React, Nodejs
Languages	:	Kotlin, Dart, Java, Javascript, Typescript
Deploy	:	CI/CD, Fastlane, Google Play, App Store, Firebase
Code Architecture	:	Clean architecture, MVVM, MVI, BLOC, Redux
Security	:	JWT, Biometric, AES, RSA, Cipher, SSL Pinning RASP (app integrity)
Testing	:	JUnit, Robolectric, Mockito, Espresso
Learning Tech	:	Jetpack Compose, Kotlin Multiplatform, Reactjs

EDUCATION

2023-10 – 2024-02	IES Intermediate In-person Course Ivy English School
2017-09 – 2017-11	Samsung Tech Institute Mobile Training UNIVERSITY OF COMPUTER STUDIES, YANGON. <ul style="list-style-type: none">• Start learning and developing android application.• More explore about training, Visit here.
2014-06 – 2019-09	Bachelor of Computer Science (B.C.Sc) UNIVERSITY OF COMPUTER STUDIES, THATON

LANGUAGE

1. Burmese (*Native*)
2. English (*Intermediate*)
3. Japanese (*N5*)

PROFESSIONAL EXPERIENCES

2024-01 – Present

Senior Mobile Developer

ONENEX (ATLAS DIGI MYANMAR LIMITED) [See more](#)

- Manage to work with junior devs, task assigning, problems solving and architecting software design.
- Apply Jetpack Compose, Unit Testing, SOLID.
- Focus on software security and integrity.

2022-09 – 2024-01

Mobile Developer

ONENEX (ATLAS DIGI MYANMAR LIMITED) [See more](#)

- Working with big team size, focusing on team communication and software quality and work done.
- Apply multi modules & clean architecture, Kotlin, Flutter.
- Deploy with CI/CD Pipelines and Firebase distribution.
- Learned new trends of Android, business domain and workflows.

2021-08 – 2022-09

Mid Android Developer

EZAY ENTERPRISE CO., LTD. [See more](#)

- Give priority to UX for older people.
- Developed 3 apps, including Seller, Buyer and Delivery for e-commerce and Logistic.
- Attending business meeting and writing up reports as an in-house team.

2020-01 – 2021-08

Android Developer

NANOLABS (LEGEND MYANMAR TECHNOLOGY) [See more](#)

- Start Android development with Kotlin and jetpack libraries.
- Follow senior guide lines and carrying out projects before deadline.

PROJECTS

1. [2c2p Wave](#) | ONENEX

The wallet app, built with Flutter, is a secure financial solution featuring OCR for document scanning, passcode and biometric login, seamless fund transfers, and top-ups via payment gateways. Integrated with RASP (Runtime Application Self-Protection), it ensures robust security against threats, delivering a smooth and safe user experience.

Tech stacks:

- Cross-platform with Flutter, Google Play and App Store deployment
- Dart, BLOC pattern, Get-It, Firebase, Pushy, Git
- JWT, Hive encryption, Root detection, RASP, SSL Pinning
- Zoloz eKYC, OCR, Passcode and Biometric login
- Money transfers and top-ups via 2c2p payment gateway
- CI/CD pipeline with Fastlane

2. [Pocket MM](#) | ONENEX

A project integrates a Loyalty Point System with seamless QR Pay and Collect functionality, aimed at enhancing user engagement for restaurants and shops. Points and reward coupons are giftable users to users and redeemable from merchant.

Security is prioritized with JWT, biometric, secured database and Runtime Application Self-Protection (RASP). More focus on UI/UX and pixel perfect the appearance to be convenience and robust for users.

Tech stacks:

- Clean architecture multi modules
- Kotlin, Jetpack Compose, Firebase, Pushy
- Navigation, Room, Dagger-Hilt, Coroutine
- JWT, Biometric, SQLCipher, Root detection, RASP, SSL Pinning
- Git, GitLab CI/CD, Firebase Distribution
- JUnit, Robolectric, Mockito

3. [Heal by Pun Hlaing](#) | ONENEX

Heal app is a comprehensive healthcare application designed for Pun Hlaing Hospital, offering features like appointment bookings, medical records management, chatting, and Video conferencing with patients and doctors. Emphasizing app security and integrity, it ensures the protection of sensitive medical records.

Tech stacks:

- Firestore realtime Chat, Twilio/Zoom-SDK Video call, Pusher Websocket
- Clean architecture multi modules
- Kotlin, Jetpack Compose, Firebase, Pushy
- Navigation, Room, Dagger-Hilt, Coroutine
- JWT, Biometric, SQLCIPHER, Root detection, RASP, SSL Pinning
- Git, GitLab CI/CD, Firebase Distribution
- JUnit, Robolectric, Mockito

4. [Star City Living App](#) | ONENEX

An estate residence app allows users to upgrade their residential status, purchase estate's sport clubs and membership packages. It also included maintenance ticket management system for addressing residents' issues and supports a community feed for residents.

Tech stacks:

- Clean architecture + MVVM
- Kotlin, Jetpack Compose, Firebase, Pushy
- Navigation, Room, Dagger-Hilt, Coroutine
- JWT, Biometric, SQLCIPHER, Root detection, RASP, SSL Pinning
- Git, GitLab CI/CD, Firebase Distribution
- JUnit, Robolectric, Mockito
- Payment integration: 2c2p, Wave, KPay, AYA Pay, CyberSource

5. [Thurriza Consultancy](#) | Freelance

A freelance project for developing software app related with astrological consultancy. [Thurriza](#) is a startup project and I am responsible for full stack development. Including Mobile App, Dashboard Portal and Backend. As per project, we focus on astrology contents and making appointment process for astrologers and customers. During development, I need to communicate with two co-workers: BA and Another Dev.

Mobile tech stacks:

- Clean architecture + BLOC Pattern
- Git, Dart, BLoC, Get-It, Go Router, Localization, Hive
- Hive encryption, Root detection, RASP, SSL Pinning
- Cross-platform (Android/iOS) with Flutter

Web tech stacks:

- Laravel 11, Vue3 + PrimeVue
- Nginx, MySql, Let's Encrypt, JWT
- Pinia, Vue-I18n
- Tailwind CSS
- ESLint + Prettier
